

Yale *Public Safety*

Maintain a safe living, learning and working environment in partnership with all whom we serve.

In order to achieve our objective, the following visionary priorities are proposed:

1

Leveraging the right resources to address public safety needs. This includes taking police officers out of situations that don't require them.

We call this fit-for-purpose.

2

Engaging the community in multiple ways – listening to every voice and ensuring access and reach.

We want those we serve to feel public safety and policing at Yale are done for them...and with them...not to them.

3

Embracing continuous improvement. That means strengthening training, systems, processes, and services, informed by Yale expertise.

This will help to ensure accountability, transparency, and alignment with the needs of the community.

4

Strengthening the Public Safety ecosystem and infrastructure as a unified University-wide asset.
