Overview

The user interface for STARS features a series of 5 dynamic panels that can be moved around at the user’s preference. These panels include the following:

- Welcome Panel
- My Calendar
- Quick Links
- My Open Reqs
- My Reqs Pending Approval

This portal features a number of movable information panes.
2. **Panel Types**

The Welcome Panel displays important messages related to the STARS system users. If you minimize this panel, it will reappear when new announcements occur.

**Welcome**

Welcome to the new STARS User Portal! This should allow users to be able to more easily access the information they are looking for.

**Note:** A required field has been added to the requisition form. Located just below the Skills and Abilities section, this field is designed to capture whether or not an individual will be required to drive a motor vehicle (whether or not Yale owns). It is part of the job duties for the position and is linked to the Motor Vehicle Check field in the Background Check section of the requisition. If your answer to this new field is "Yes", then the Motor Vehicle Check field in the Background Check section of the requisition will automatically be updated to a "Yes" answer and you should be sure to include the driving responsibilities in the position description. If your answer is "No", then the "Motor Vehicle Check" field in the Background Check section of the requisition will automatically be updated to a "No" answer. This addition will assist us in determining the proper level of background check screening that should take place.

Kanoxa conducts standard maintenance on the third Saturday of every month from 2:00am to 11:00am. The system may be unavailable during these hours. Upcoming maintenance dates include:
- Saturday, July 17, 2010
- Saturday, August 21, 2010
- Saturday, September 11, 2010

**Need help?** You can call, email or visit our site for assistance.
STARS Hotline Number (IT Help Desk): 485-9000 or 785-5200
STARS Email: stars@yale.edu

---

**My Calendar** integrates with your existing Outlook calendar. You can view and create appointments without leaving STARS.

*Note: This feature only works when you are using Internet Explorer and logged into your own computer using your Net ID and password.*

To create a new appointment, right click inside the calendar and choose ‘New Appointment’.

To change your calendar view (i.e. days, weeks, months) right click in the calendar and choose ‘Go to Date’ and then choose the view you’d like to display.
The *Quick Links* panel allows you to add, and group, important links you might use throughout your day.

Links are there for quick access to related information, including the ability look up your Recruiter or HR Generalist.

There are a few STARS links, including: quick access to STARS support, adding a name to a STARS req drop-down list (i.e. hiring manager or principal investigator).

Also, you'll find a few links to forms you may frequently utilize, including some Background Check request forms.

Click ‘Add’ to add a new folder, and/or a new link (which you can group in the folder of your choice).
*My Open Reqs* displays all of your current open reqs, along with req information (*job title, req number*) and a numerical count of candidates for each type (layoff, *internal, external*) that have applied to those reqs.

You can hover over a req # to see req details, or click on the req number to view the entire req.
To view the candidate’s resume and talent profile, click on the candidate’s name.

If you click on the highlighted number under a candidate type, it will open the candidate details in a new panel.
Talent Record displays all of the candidate’s information.

This section enables you to view forms (such as the offer form), send communications (such as turndown letters), and view attachments.

Select the various tabs in this section to view Contact Details, Resume, Cover Letter, and a summary of Experience/Education.
Panel Customization

You can configure your homepage to better suit your workflow. These customizations are maintained after you log out; you will not have to make the changes every time.

Panel Controls

Every panel has a number of controls. Four standard controls appear, depending on the panel.

1. Refresh: Refreshes the information contained in the panel.

2. Minimize: Minimizes the panel to a tab form at the top of the screen.

3. Maximize: Expand the panel to fit your entire home screen, allowing you to view more of the panel without having to scroll.

4. Close: Removes the panel from your home screen entirely.

Note: Not all panels can be closed.
Any panel that you elect to minimize will appear in a tab here at the top of the screen.

Adding/Removing/Restoring Panels
This feature is used to add panels that you have closed or to remove existing panels that you no longer want to see. You can do so by pressing the +/- button next to “Hiring Manager Portal” at the top.

Pressing the +/- button will give you a number of options for customizing your panels.

If you have removed a panel and would like to add it back in, you can click on Add Panel and it will display a list of panels you have removed.

If you would like to restore all of the default settings (how STARS looked the first time you logged in to the new portal), click on Restore Defaults.

Resizing and Moving Panels
Panels can be resized and reordered any way you wish. These changes are saved by STARS upon logout.
The panels are organized into 2 columns. The column divider will turn blue (and a double-sided arrow will appear) when you hover in between 2 panels.

This divider dictates the width of the panels in each column, which you can move by clicking the line and dragging to the left or right.

Moving all the panels into one column will cause them to expand the width of the screen into one column.

To enlarge a panel, place your mouse at the bottom center of the panel (the line will turn blue and you’ll see the double-sided arrow). Drag the panel to the desired size.
3d. Filter & Display Options
Most panels have a number of filter options. Filters are maintained until cleared and can be saved. Under the display option, users can change the sort for the panel.

Active filters are denoted by a number over the Filter menu and a check mark next to the filtered item.

Choosing Clear Selections will remove all filters.

To move a panel, place your cursor at the top of the panel. You will see a cross-shaped arrow. Click and drag the panel and drop it at the desired location.
