1 FDP EXPANDED CLEARINGHOUSE PILOT – COHORT 2 IS LIVE!

Effective immediately, Yale is “live” as a part of the Federal Demonstration Project (FDP) Expanded Clearinghouse Pilot (“Pilot”). Therefore, when Yale is the Pass Through Entity (PTE), the following must be collected from the participating FDP institution(s) (Cohort 1 and 2) subrecipient institution:

- A one-page Letter of Intent (LOI)
- The Scope of Work
- Budget and Budget Justification
- Any other sponsor required information

1 Note Yale will no longer collect Subrecipient Information and Compliance (SIC) forms from FDP institutions participating in the Pilot (http://your.yale.edu/sites/default/files/cohort_1_and_2_institutions_list.pdf).

When Yale is a subrecipient and the Pass Through Entity is a participant in the Pilot, Yale will no longer complete that institution’s version of a SIC form, but will provide the PTE a completed one-page LOI, if requested.

If a subrecipient is included in a proposal that is not on the FDP Cohort 1 and 2 list, the department must continue to receive the following from the subrecipient:

- A completed and signed SIC form
- The Scope of Work
- Budget and Budget Justification

Follow this link http://your.yale.edu/research-support/office-sponsored-projects/proposals/subawards/fdp-subrecipient-pilot to the webpage that contains Yale’s fillable LOI and the list of Cohort 1 and Cohort 2 FDP institutions participating in the Pilot. The webpage also includes FAQs, Yale’s SIC form, and the brown bag presentation conducted on August 8 and 9 which informed the community of the Pilot.
Questions about what is needed at the proposal development stage from a subrecipient when Yale is the PTE, should be directed to your OSP proposal manager. Your OSP award manager is available to answer any questions about what documentation should be completed when Yale is the subrecipient. Any other inquiries regarding the Pilot should be directed to Lauren Pite lauren.pite@yale.edu.

2  UPDATE: PROJECT PERSONNEL INFORMATION IN NIH RePORTER

The National Institutes of Health issued NOT-OD-16-126 as a rescission of NOT-OD-16-088 “Notice of Intent to Release Names of NIH-Funded Research Project Personnel in the NIH Research Portfolio Online Reporting Tools Expenditures and Results (RePORTER) System”. NIH does NOT plan to release in RePORTER the names of all project personnel (i.e. Name, Degree, Role on project, and if applicable, foreign organization and country) listed in section D (Participants) of the annual Research Performance Progress Reports (RPPRs).

3  CLINICAL TRIALS BUDGETING

The Office of Sponsored Projects (OSP) is committed to ensuring that all research conducted at Yale is of the highest standard. As part of our mission to promote compliance and efficient research we have created a training curriculum that includes both online and instructor-led training sessions designed to assist Yale researchers and administrators in understanding the myriad regulations, policies and requirements in the administration of sponsored awards.

Are you interested in improving your clinical trial budget negotiations and enhancing your efficiency in clinical trial startup and billing? We highly recommend you attend our upcoming training session on Clinical Trials Budgeting, currently scheduled for September 19th.

The instructor-led Clinical Trials Budgeting course will focus on the following learning objectives:

- Gaining a better understanding of the budget development process for clinical trials
- Learning about what can and cannot be included in a clinical trial budget while ensuring expenditure recovery for both federal and non-federal sponsors
- Ensuring clinical trial budgets and subsequent billing are in accordance with regulatory sponsors and Yale requirements

The upcoming offering, as well as other valuable OSP training modules, are available in TMS. Click on the following link to register for the September 19th course:
